

# About DeBe Lasers

DeBe Lasers was founded in 1998 and is based in Haynes, Bedfordshire, UK. Our directors have more than 40 years experience designing affordable laser solutions for many different industries.

There are many businesses that offer standard laser solutions, including low priced companies in China and the Far East, and large providers that only cater for big customers.

DeBe Lasers stand out from these competitors by offering straightforward, flexible services which are both affordable and value for money.

## DeBe Lasers' location offers

- Excellent motorway links
- Close proximity to London
- Modern industrial property
- Room for future expansion
- Building includes offices, laboratory and testing facilities

We design complete modular laser systems, making them easy to upgrade and expand as your needs change.

Our depth of experience gives us the flexibility to offer innovative products to achieve your required results.

Being UK based we provide personalised support for all of our products, giving you the help you need on demand.

## Services supplied

- A wide range of laser systems for marking, welding and cutting
- Bespoke laser systems
- Laser safety audits
- Laser beam analysis systems
- Long range illumination systems
